SUMMARY

I'm a motivated IT fresher with experience in UI/UX design and manual testing, and a strong interest in development. I'm passionate about coding and currently building my skills in full-stack technologies. I enjoy designing clean interfaces, and delivering quality work. I'm eager to learn, grow, contribute, and I would love the opportunity to join your team and add value.

WORK EXPERIENCE

Comorin Consulting Services, Nagercoil   Aug 2025 - Present

Trainee (Full-time)

Manual Tester – Fitness On Call (Kuwait Based):

Performed manual testing across Admin, Customer, and Trainer modules for a real-time fitness management platform. Tested the complete flow where customer trainer requests reach the admin panel and are assigned within one hour. Verified trainer allocation, session updates, approvals, and workflow transitions. Conducted functional, UI, and regression testing to maintain smooth user experience. Documented bugs and coordinated with the team for timely fixes.

AMC (Annual Maintenance Contract) – Design Corrections:

Managed warranty follow-ups and guided customers to join the Annual Maintenance Contract after the warranty period ended. Supported customers with service continuity, issue resolution, and replacement guidance. Coordinated with technicians for on-site visits and ensured timely service delivery.

UI/UX Designer – Washington Tamil Sangam (US Based):

Designed the full member management portal for the Washington Tamil community. Created clean UI flows for different membership packages and managed the display of member statuses. Ensured smooth navigation and a user-friendly experience for admins.

UI/UX Designer – Smart Grocery App – (Training Project):

Designed UI screens for a group-based grocery planning app, enabling users to create groups and manage shared grocery lists. Added features for member management, collaborative updates, and real-time list modifications. Focused on a clean and simple interface for adding, removing, and marking items as purchased.
